

“We’ve Never Done It This Way Before”

We have said this countless times throughout the Covid-19 pandemic. At First Rolla, we like many of you, have modified our existing ministries and embarked on new ones. Recently, as the vaccine roll out began in Missouri, we realized how difficult it is to register to receive it. There is no central database providing information, registration, or access. It all requires computer skills and monitoring different websites. Many of our senior adults wanted the vaccine, they just did not know how to get it. As this became apparent, the First Rolla Session organized the effort to help our folks navigate the process, register for the vaccine, and get to the appointments. The Deacons and Ruling Elders are working together to carry out this ministry together and help our most vulnerable members. We are thankful for good ideas and willing hearts who continue to minister through these days.
